# AREE DA GIOCO SU MISURA

AREE DA GIOCO UNICI SU MISURA SECONDO LE VOSTRE ESIGENZE

## Volete creare qualcosa di più di un parco giochi normale?

Una grande esperienza che attiri visitatori anche da lontano? Scatenate la vostra immaginazione quando progettate un parco giochi di destinazione. Scatenatevi, impazzite e divertitevi! Al resto pensiamo noi.

### Design scultoreo o a tema?

Offriamo due direzioni di progettazione distinte che accenderanno la vostra immaginazione e daranno vita al vostro progetto:

**Il design scultoreo** si integra perfettamente con l'ambiente architettonico. Immaginate una struttura che diventa un'opera d'arte, sia come punto di riferimento e che si integra armoniosamente con l'ambiente circostante.

Possiamo anche iniziare a raccontare una storia e a creare **un progetto a tema** per chi cerca un'avventura coinvolgente. Immaginate di entrare in un mondo di pirati, in cui ogni angolo è un nuovo capitolo che aspetta di essere esplorato.

## Budget

Nei parchi pubblici il budget viene normalmente assegnato sulla base delle conoscenze e degli studi di fattibilità dei funzionari comunali. Se i costi di sviluppo superano il budget potrebbe essere consigliabile rivedere il piano per costruire il progetto.

## Utenti / target

Chi utilizzerà il parco giochi? Qual è la demografia delle persone che vivono nelle vicinanze del parco giochi?

- Bambini
- 0-2 anni
- 2-5 anni
- 5-12 anni
- Bambini con esigenze speciali
- Adolescenti
- Quanti bambini deve ospitare il parco giochi in qualsiasi momento? (Capacità)
- C'è la possibilità di includere attrezzature anche per gli adulti (palestra / fitness / sport per anziani)
- Ci sono utenti passivi?

## Tema del parco giochi parco giochi

C'è una storia che potrebbe ispirare il design o la scelta dei prodotti?

14.

**Installazione**  
 Assicurarsi che gli attrezzi siano assemblati ed installati da professionisti.  
 Non dimenticate di programmare le ispezioni periodiche del parco. e dei suoi attrezzi.  
 Il team d'installazione apprezzerà queste informazioni:

- Foto dell'area
- Com'è il terreno? (asfalto, sabbia, erba, bosco, ecc.)
- Definizione della data per l'installazione

- Accessibilità per le macchine di manutenzione e per le macchine per il lavoro a terra
  - Percorsi di servizio durante l'installazione
  - Persona di contatto e relativi recapiti per eventuale domande

**Pavimentazione di sicurezza**

- Erba artificiale
- Matonelle di gomma
- Erba
- Ghiaia
- Sabbia
- Corteccia
- Superficie in gomma gettata in opera

Preventivo per la superficie di sicurezza:

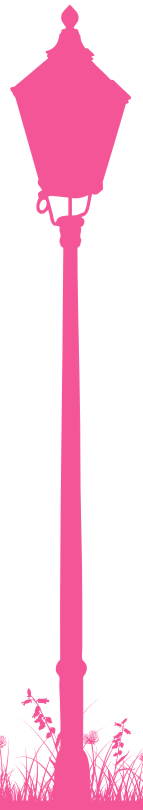

- preparazione del sito (scavo, superficie in cls)
- installazione della superficie di sicurezza

Il tipo di materiale di rivestimento può avere un impatto significativo sul costo del parco giochi e sul suo ciclo di vita.

12.

**Altri punti:**

- Illuminazione
- Punti di ingresso e di uscita
- Percorsi pedonali
- Le stagioni:  
 Un campo da calcio può essere una pista di pattinaggio in inverno?  
 C'è spazio per il deposito (temporaneo) della neve?

## PLANNING TOOL La scelta delle attrezzature giuste

1. Scelta dell'**ATTREZZATURA PRINCIPALE** a secondo dell'età dei bambini che frequenteranno il parco da gioco
2. Scelta delle **ATTREZZATURE INTEGRATIVE** che stimolano le abilità importanti per questa fascia d'età di bambini
3. Scelta di **ELEMENTI AGGIUNTIVI** per creare un area da gioco completa (vedi consigli sulle pagine precedenti „Come pianificare un area da gioco“)
4. Scelta di **GIOCHI INCLUSIVI** per creare un area da gioco accessibili per tutti. Scegli le attrezzature segnate con il sole 

A un bambino piace praticare le abilità motorie che ha appena imparato

**I bambini sotto i 2 anni** si trovano nella fase iniziale del gioco, in cui il bambino impara a conoscere se stesso e l'ambiente che lo circonda muovendosi e osservando.

Il gioco può consistere, ad esempio, nel gioco con oggetti o nella sabbiera. Questo spesso è anche piuttosto fisico, poiché il bambino ama mettere in pratica le proprie abilità motorie che ha appena imparato. Il bambino può giocare da solo o insieme ad altri bambini.

Nella fase successiva, **tra i 3 e i 4 anni**, i giochi di ruolo e di fantasia diventano parte del gioco. Il bambino spesso imita quello che fanno gli adulti e si interessa, ad esempio, gioco da infermiera o medico. I bambini imparano anche da altri bambini che sono presenti nel parco giochi. Ci sono poi anche i giochi di regole, che si sviluppano insieme al gioco di ruolo. Il bambino ha già la capacità di di lavorare insieme e di rispettare le regole. Giocare insieme sviluppa, tra l'altro anche il comportamento sociale e la capacità di negoziazione.

## Attrezzature da gioco per scuole medie e superiori

„Non giochiamo più!“. È un'affermazione tipica dei ragazzi delle scuole superiori. Ma noi sappiamo che giocano, solo a modo loro. Basta un parco giochi adeguato e attrezzature sportive per far sì che i ragazzi più grandi giochino e siano attivi durante la scuola.

Le nostre attrezzature per le scuole secondarie per gli studenti più grandi offrono ai giovani adulti spazi di attività coinvolgenti per le ragazze e i ragazzi che non vogliono più giocare sulle attrezzature tradizionali, ma hanno ancora bisogno di luoghi in cui passare il tempo e consumare energia.

# I cinque principi di progettazione per le nostre attrezzature per parchi giochi interattivi

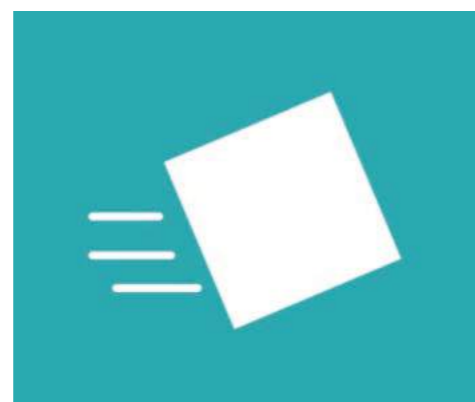

## DIVERTIMENTO

„Per favore, posso andare ancora una volta?“ è una frase che potresti sentire da un bambino a un genitore in un parco giochi. Ci piace sentirlo dire da chiunque giochi con i nostri prodotti perché significa che qualcuno si sta divertendo. Ci piace includere l'effetto „one-more-time“ in tutti i nostri progetti. Il divertimento è una priorità assoluta, perché se non è divertente nessuno giocherà e puoi dimenticarti degli altri quattro principi.

## ATTIVO

Ci piace che i nostri prodotti siano in grado di far alzare le persone dal divano e farle muovere! Trascorriamo così tanto tempo in posizione seduta, nota anche come „malattia della seduta“. La ricerca ha dimostrato che 3 bambini su 4 nel Regno Unito trascorrono meno tempo fuori rispetto ai detenuti. Progettiamo i nostri prodotti per coinvolgere le persone in un modo giocoso che fa bene al corpo e alla mente.

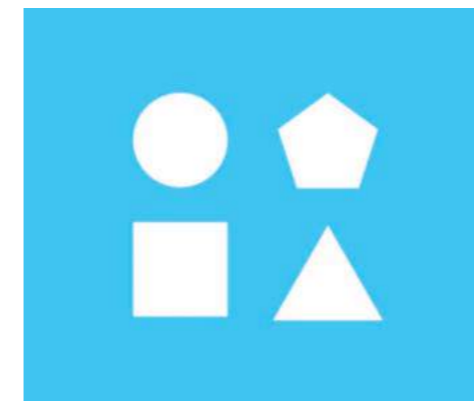

## INTELLIGENTE

Combiniamo elementi di gioco e giochi all'aperto per creare un nuovo modo di giocare. Utilizziamo tecnologie innovative per migliorare il livello del parco giochi e creare ambienti di gioco magici. Carica nuove fantastiche funzionalità e giochi sull'attrezzatura da gioco affinché gli utenti possano scoprirli. Il gioco si adatta dinamicamente all'utente e il software può essere adattato ai giocatori. Utilizziamo i dati dei nostri set da gioco per migliorare continuamente tutte le nostre installazioni.

## ALL'APERTO

Crediamo nel potere del gioco all'aperto sano e avventuroso. Ad esempio, ballare fuori sotto la pioggia con i tuoi amici o giocare a calcio in una giornata soleggiata. Ecco perché progettiamo tutti i nostri prodotti interattivi affinché durino all'esterno, resistenti alle intemperie e agli atti vandalici. I nostri giochi possono essere collocati anche all'interno.

## CREATIVO

Come progettisti Lappset, non creiamo il gioco ma le possibilità di giocare. Se lo facciamo bene, offriamo ai giocatori "1001 modi di giocare" per scoprire se stessi. Nella nostra esperienza, le uniche persone che si chiedono „come dovrebbero giocare“ sono gli adulti. Non diciamo ai giocatori come giocare ma diamo loro alcuni suggerimenti, oltre alla libertà di sviluppare le proprie regole ed idee per creare la vera magia!

# Area scolastica: Istruzioni per la progettazione di un ambiente da gioco funzionale

Il coinvolgimento di un gruppo di dimensioni adeguate di persone provenienti da contesti diversi garantisce il maggior successo nella pianificazione di un'area da gioco. Esistono diversi modi creativi per coinvolgere i bambini nella progettazione, ad esempio con disegno, scrittura, interviste e realizzazione di modelli in scala. La cosa più importante è coinvolgere il maggior numero di diversi alunni e utenti della scuola nel progettare la nuova area.

Gli alunni possono partecipare al processo decisionale, invitandoli per esempio alle riunioni che è un ottimo strumento di apprendimento per tutti.

## Area scolastica

- Percorsi di accesso, percorsi scolastici, percorsi per il traffico leggero
- Percorsi di soccorso e di servizio, manutenzione invernale (neve), dimensioni e forma dell'area
- Descrizione delle vicinanze (area del parco, edifici, aziende, ecc.)
- È necessario recintare l'area?
- Nell'area rimarrà un angolo di bosco (condizioni naturali)?
- Direzione della luce e dei raggi solari
- Alberi ed altri elementi ombreggianti che rimangono nell'area?
- Eventuali regolamenti relativi alla progettazione dell'area
- C'è/ci sono attrezzature esistenti?
- L'attrezzatura esistente è stata ispezionata? In caso contrario, quando dovrebbe essere effettuata?
- Quanto spazio deve avere il parco per utenti simultanei? (Capacità, dimensioni della scuola, orario dell'intervallo)
- È possibile includere attività per persone di tutte le età, considerando anche l'uso serale? Ad esempio, palestra / fitness / sport per anziani

## Come può essere un apprendimento funzionale all'aperto?

Nella migliore delle ipotesi, l'ambiente può offrire diverse opportunità di apprendimento. La foresta vicina può essere utilizzata durante le lezioni di biologia per identificare la flora, la base di sicurezza disegnata in diversi colori può essere utilizzata per gli esercizi di matematica, e la storia può essere studiata utilizzando aree tematiche.

Le attrezzature interattive per il gioco e lo sport, in particolare possono creare ambienti di apprendimento senza eccessiva pianificazione.

## Chi sono i Moomins?

I Moomins sono personaggi di finzione creati dalla scrittrice ed illustratrice finlandese di lingua svedese Tove Jansson.

Dall'aspetto simile ad ippopotami bianchi, abitano nella valle omonima, luogo tranquillo e sicuro, e le loro storie narrano degli eventi che accadono nella valle...

## Prima infanzia

**Il gioco in un asilo nido o in una scuola materna offre ai bambini molteplici opportunità di fare esperienze motorie e sensoriali: sviluppare la loro intelligenza, le loro relazioni con gli altri e la padronanza del proprio corpo. L'area gioco, attraverso la sua organizzazione in ambiente educativo, consente anche agli educatori di seguire un programma orientato alla progressione motoria dei bambini piccoli.**

# Lo sapevi... Le fasi del sviluppo motorico del bambino

L'apprendimento delle abilità motorie avviene più o meno dello stesso ordine, anche se un bambino può essere più veloce dell'altro. Nel suo processo di crescita fisica un bambino sperimenta periodi di sensibilità, durante i quali particolarmente predisposto all'adozione di determinate abilità motorie.

**L'apprendimento delle abilità è il risultato combinato di maturità fisica e dell'allenamento.**

Un bambino che ha imparato a camminare passa improvvisamente da un rotolamento a gattoni a un pacchetto di energia attiva e si muove quasi costantemente. L'estensione delle capacità motorie estese favoriscono la capacità del bambino di percepire l'ambiente. Le abilità motorie del bambino procedono di base, come camminare, correre e saltare, fino a prestazioni di movimento più impegnative, come quelle di movimento più impegnative, come quelle necessarie per praticare sport o musica.

**Le abilità motorie di base più essenziali e le combinazioni di movimento che il bambino apprende prima dell'inizio della scuola.**

**L'età compresa tra i 7 e i 12 anni è il periodo in cui la capacità dei bambini di imparare di apprendere le abilità motorie aumenta rapidamente.** Questo è il periodo migliore per l'apprendimento delle abilità fisiche. Il processo di apprendimento è supportato dal miglioramento delle qualifiche corporee, flessibilità del funzionamento dei nervi e dalle precedenti esperienze di movimento.

**Dando degli stimoli, l'apprendimento motorio dei bambini può essere notevolmente migliorato.** La mancanza di stimoli, d'altra parte, può impedire o spegnere l'automatizzazione delle abilità e rallentare le fasi successive di sviluppo.

L'esercizio fisico migliora i fattori che influenzano le condizioni e sulle capacità motorie del bambino.

**I fattori che influenzano la condizione sono:**

- resistenza
- la forza
- mobilità e
- velocità.

**I fattori che influenzano le capacità motorie sono:**

- l'equilibrio
- capacità di seguire il ritmo
- capacità di percezione spaziale
- capacità di controllare la forza, il tempo e lo spazio
- capacità di adattamento
- tempo di reazione e
- capacità di combinazione.

Scegliendo attrezzature di gioco versatili e stimolanti di gioco versatili e stimolanti, possiamo influenzare lo sviluppo di queste capacità. I giochi versatili sono sufficienti per un bambino piccolo per sviluppare la forza.

Per i bambini dai 7 ai 13 anni l'arrampicata su corde e reti, così come i salti e gli appendimenti, sono esercizi adatti.

Altalene, scivoli, travi di equilibrio e strutture per arrampicarsi sono adatti per l'allenamento dei movimenti di base come strisciare, dondolare, saltare, lancio, presa, ecc. e dei fattori di condizione e di abilità.

# Giochi a molla e bilici

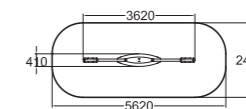

I giochi a molla per parchi sono attrezzature per i bambini piccoli che non possono mancare in un parco giochi. I giochi a molla sono ideati per supportare lo sviluppo dell'equilibrio e della coordinazione dei movimenti.

## Vantaggi del scivolo a pendio

Oltre all'immensa emozione di scivolare, lo scivolo da pendio aiuta anche i bambini a sviluppare importanti abilità motorie come il senso dell'equilibrio e dello spazio. Si tratta di abilità importanti per gestire il mondo con fiducia e sicurezza. Il circuito ripetuto di sciolate e risalite è un ottimo allenamento per il cardio e la forza muscolare.

GIOCHI DIDATTICI

# Sabbiere

I bambini si divertono e agiscono su un materiale le cui proprietà consentono loro di fare molteplici esperimenti. I giochi di sabbia incoraggiano anche i bambini a giocare assieme nel parco giochi, a condividere e a rispettare il gioco degli altri.
