

Pocket Parks

making our cities more livable!

DE

Pocket Parks, auch bekannt als Mini-Parks, sind kleine Grünflächen in städtischen Gebieten, die viele Vorteile bieten. Sie verbessern die Umweltqualität, fördern soziale Interaktionen und tragen zur physischen und mentalen Gesundheit bei. Zudem unterstützen sie die Biodiversität und dienen als Oasen, die zur Abkühlung und Luftreinigung beitragen. Pocket Parks beruhigen den Verkehr, indem sie Parkplätze in grüne Oasen umwandeln, die Fußgängern und Radfahrern zugutekommen. Als Produzent nachhaltiger Stadtmöbel beraten und gestalten wir individuell angepasste Pocket Parks, die Sitzgelegenheiten, Pflanzschalen und Schattenelemente umfassen.

Als Gestaltungsgrundlage haben wir verschiedene Elemente entwickelt, welche beliebig miteinander kombiniert werden können. Unsere Pocket Parks sind mobil, können auf Wunsch aber auch fix montiert werden.

IT

I **Pocket Parks**, noti anche come mini-parchi, sono piccole aree verdi nelle zone urbane che offrono molti vantaggi. Migliorano la qualità dell'ambiente, favoriscono le interazioni sociali e contribuiscono alla salute fisica e mentale. Inoltre, supportano la biodiversità e fungono da oasi che contribuiscono al raffreddamento e alla pulizia dell'aria. I Pocket Parks calmano il

traffico trasformando i parcheggi in oasi verdi a beneficio di pedoni e ciclisti. Come produttore di mobili urbani sostenibili, offriamo consulenza e progettiamo Pocket Parks personalizzati che comprendono posti a sedere, vasi per piante ed elementi ombreggianti.

Abbiamo sviluppato diversi elementi come base per la progettazione, che possono essere combinati tra loro a seconda delle esigenze. I nostri Pocket Park sono spostabili, ma possono anche essere installati in modo permanente su richiesta.

ENG

Pocket Parks, also known as mini-parks, are small green spaces in urban areas that offer many benefits. They improve environmental quality, foster social interactions, and contribute to physical and mental health. Additionally, they support biodiversity and serve as oases that aid in cooling and air purification. Pocket Parks calm traffic by transforming parking spaces into green oases that benefit pedestrians and cyclists. As a producer of sustainable urban furniture, we offer consultation and design customized Pocket Parks that include seating, planters, and shade elements.

We have developed various elements as a basis for the design, which can be combined with each other as required. Our Pocket Parks are movable, but can also be permanently installed on request.
